

FOR IMMEDIATE USE – 24 April 2012

HUNTSMAN TIOXIDE AWARD KHI CHLORINATOR CONTRACT

Investment in new Process Technology at Huntsman Pigments Greatham – Project I.C.E.

K Home International are delighted to support Huntsman Tioxide in the design and construction work which has begun to build new reactors (Chlorinators) at the Huntsman Pigment Site at Greatham near Hartlepool.

Project I.C.E. (Improved Chlorinator Efficiency) will result in improved efficiency, reduced environmental footprint and greater feedstock flexibility for the site.

K Home International are providing Civil and Structural Design support to Huntsman Pigments Design Team located at the Greatham site and the new reactors are being fabricated by Wilton Engineering Group on Teesside.

K Home International are currently engaged in the Construction Management and HSE Management support to Huntsman Tioxide Project Management Team throughout the construction programme in 2012, with the first new reactor will be commissioned in Q2 2013 with a further 3 units planned for subsequent years.

On completion the factory will be equipped with World Leading Chlorinator reactor technology.

The project has been awarded a Regional Growth Fund Grant through the Department of Business Innovation and Skills.

FOR IMMEDIATE USE – 24 April 2012

Andrew Home CEO said.....

“K Home International’s relationship with Huntsman Tioxide goes back nearly 25 years during which time we have worked together on two major investments in Teesside, and this Contract Award for Engineering and Construction Management Services demonstrates the fact that here on Teesside we have world class expertise capable of meeting the challenges of today’s highly competitive environment and providing the support needed to satisfy the need of the global process industry”.
