

FOR IMMEDIATE USE – July 2017

Apprenticeship completed - Well done to Jack!

l~r: Amanda McMahon – Manager of Engineering, Jack Hustwitt Civil/Structural Designer

Jack Hustwitt of K Home International (KHI) has successfully completed his Advanced Level Apprenticeship in Design and Draughting.

Jack has been following a Design Technician Apprenticeship Framework, working extensively with CAD packages such as AutoCAD and PDMS. As well as gaining background information and experience within each discipline KHI has to offer, which include; Process Engineering, Piping and Pressure Systems, Civil and Structural, Mechanical / Materials Handling, Electrical and Instrumentation and Control.

Jack recently completed his HNC in Civil Engineering and will be working within the civil and structural department, from September 2017 will attend Teesside University for one day a week, studying towards a BEng Civil and Structural Engineering Degree part time over 4 years.

Amanda McMahon, Manager of Engineering for KHI and advocate for Apprenticeships commented on his recent achievements; *“Congratulations to Jack on successfully completing his apprenticeship. Jack has an excellent reputation within KHI having both contributed to live projects & joining in activities such as school careers events. The technical skills Jack has acquired will be of benefit to the future of our business and allows KHI to provide our clients with qualified technicians and engineers within the multi-discipline services we have on offer.”*
