4.0 Million Man-hours without Lost Time Accident

K Home International Limited (KHI) is proud to announce it has achieved 4.0 million man-hours without a lost time accident by all employees at their head office and on clients' project sites.

This result reflects a continual commitment to Health, Safety and Environmental (HSE) management within all levels of the business. Excellent HSE compliance ensures everyone can go home at the end of the day without injury, and the company has established an ethos of competency and safety-focus throughout.

This comes just a week after receiving The RoSPA Presidents Award for achieving the RoSPA Gold Award for Health and Safety 13 years in a row and is a reflection of the consideration provided to HSE management aspects of all projects from initial concept design, detailed design through to construction management and commissioning support. The sectors in which KHI provides its services include chemical, petrochemical, energy and nuclear plants including other heavy industries such as minerals extraction and metals manufacture. The requirement to 'design to avoid risk to health, safety and the environment' is inherent in KHI's procedures.
